- Final-year B.Tech Computer Science & Engineering student with a growing interest in Full Stack Web Development. I have intermediate-level experience in both Data Structures & Algorithms and Web Development, and I'm continuously working to strengthen my skills through hands-on projects and practice..
- Proficient in JavaScript, React.js, Node.js, and MongoDB, with experience in building responsive and user-friendly applications.

• Skills

- Web Technologies: HTML, CSS, JavaScript
- Frontend Frameworks & Libraries: React.js, Redux Toolkit, Tailwind CSS
- Backend: Node.js, Express.js, MongoDB
- Real-Time Communication: WebSocket (Socket.io)
- Authentication & Security: JWT Authentication, Bcrypt, REST APIs
- Development Tools: Git, GitHub, VS Code, Postman, Compas

PROJECTS

- **Realtime Chat Application:** Built a real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js) with Redux for efficient state management and Tailwind CSS for a modern, responsive UI. Integrated Socket.io for instant message delivery, implemented user authentication, and ensured smooth real-time communication with message persistence and seamless user experience across devices.
- **E-Commerce Website:** Designed and developed a responsive e-commerce web application using React.js, allowing users to browse products, view detailed product pages, add items to the cart, and securely place orders. Implemented dynamic routing, product filtering, and state management for real-time cart updates to ensure a seamless user experience.
